The device can be working in the sun, rain, snow, dust and wind weather, This outdoor display can be 24 hours and all seasons running.

RELIABILITY FOR OUTDOOR USAGE

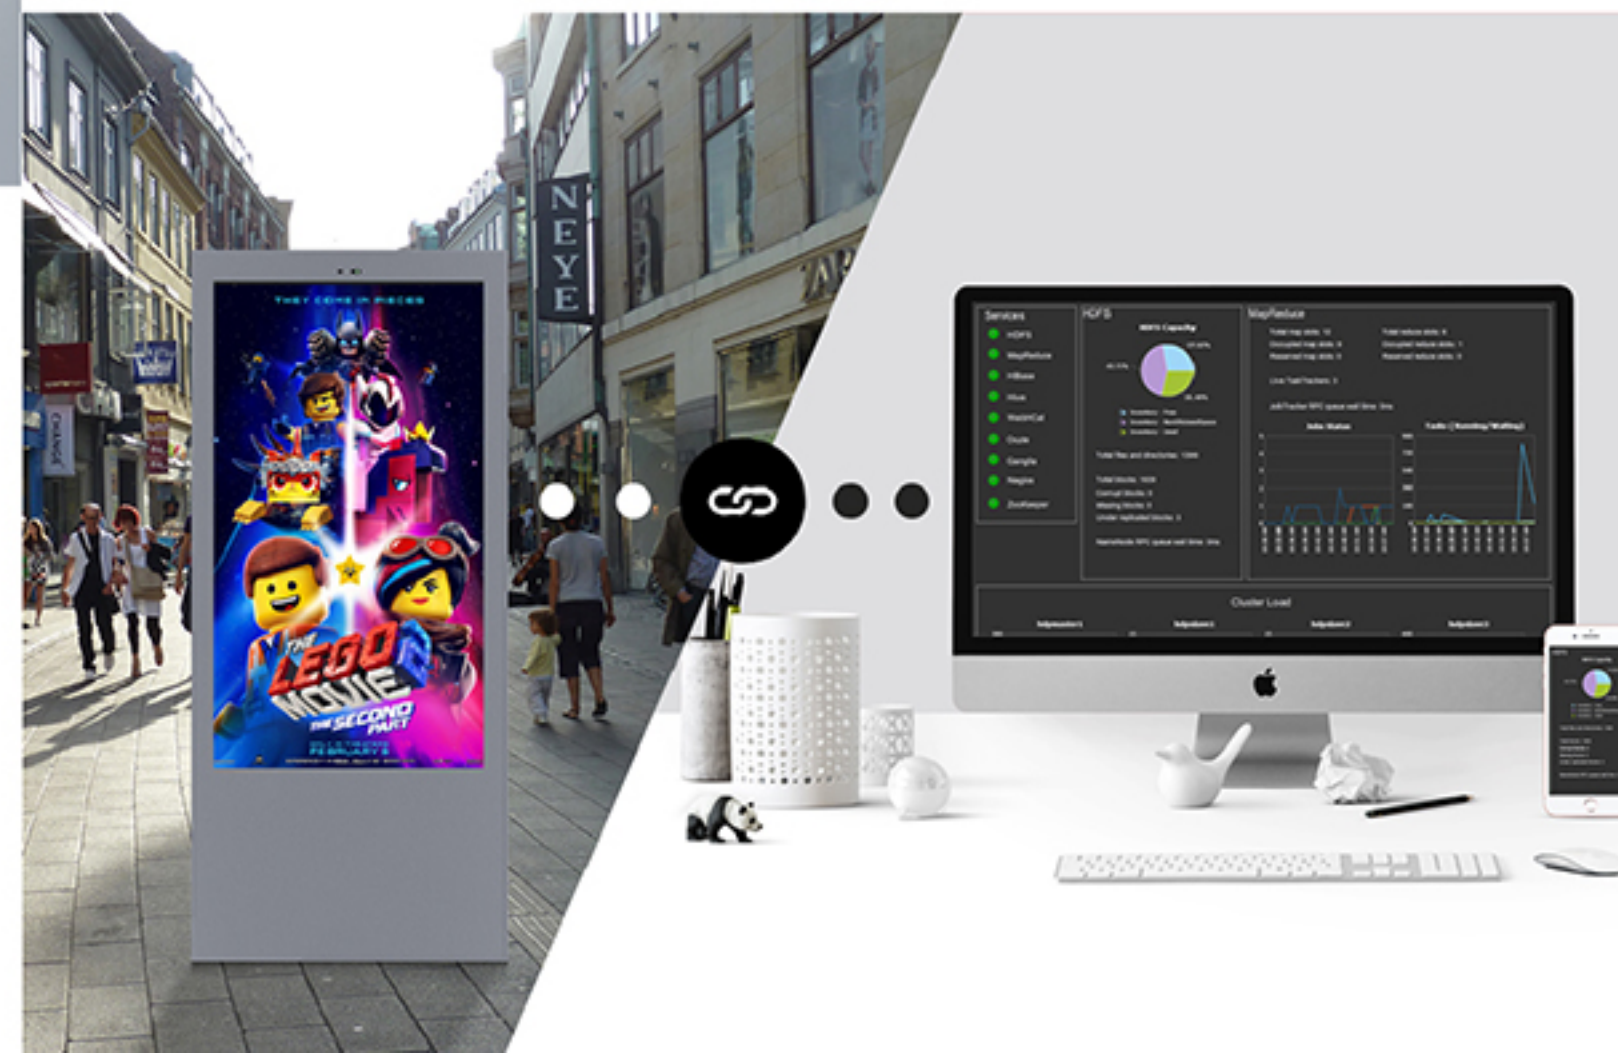

Protective Glass (IK10 Certified)

The commcal tempered frond glass make sure the good protection from external imparts.

EASY MAINTENANCE

Remote control

XDS makes it is possible to control and monitor the display at a good condition at any time or any where.

Digital Window Display

Digital Window Display with
3000nits High Brightness

Resolution:1920x1080
Brightness: 3000nits
Contrast: 3000:1
Response time: 6ms
Viewing Angel: 178/178
Chip solution:RK3288
Android system version: 7.0
RAM/ROM: 2G+8G

Our cases of this high brightness display, help doing promotion and activities of our display, shopping mall is the best place to install our display.

This allows for reduced power usage by automatically powering off in hours that the displays are not required. you can set daily on/off times for your displays.

Built with commercial grade panel and components these displays are designed to run 24/7 in constantly use; unlike normal screens. the panel also has a over 50000 hours of continuous use. they can also be used in landscape or portrait orientation.

Design for application in direct sunlight such as window displays, we use a special ultra-high brightness panel to making this the number one choice for digital signage in window displays.

What we concern is provide the high brightness with lower power consumption.

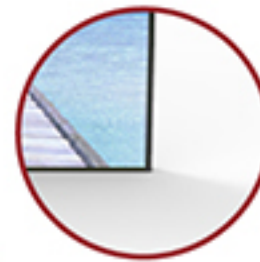

Digital Window Display

High brightness display

It is highlighted,
and it is still clearly visible
under direct sunlight.
Can adjust the brightness of
the screen according to the environment

18mm

18mm ultra-narrow bezel

Wall-mounted standard installation,
takes up less space,
industrial ultra-thin narrow-edge design,
thickness is only 18MM, IPS panel has a large display area,
but is small in size and light in weight,
which brings customers excellent visual and auditory enjoyment.

High-performance processor

The configuration adopts RK3288
architecture high-performance processor,
brand-name motherboard,
faster speed and stronger control.

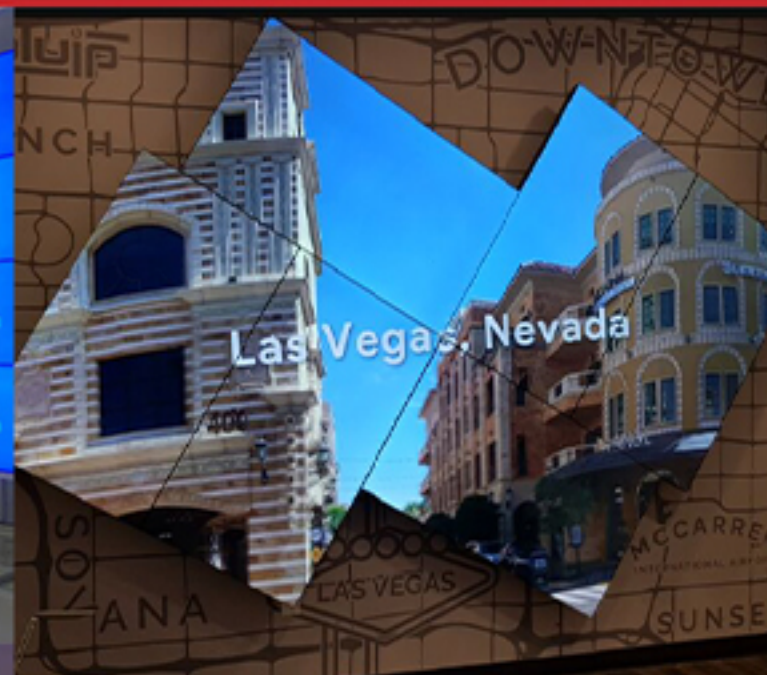

Practical Application

Use intelligent control software to control and configure multiple LCD displays through an RS232 or RJ45 connection (Regardless of the monitor's location) to make the screen easier to set up and the status of all networked displays.

Through the display's built-in splicing function, it is able to support for a maximum of 15 x 15 total 225 screens to display the complete picture perfectly and without external connection of the processor management equipment.

The DID LCD screen has a contrast ration of 3000:1, which is more than twice as high as a conventional PC or TV LCD screen.super wide viewing angle of 178° vertically and horizontally.

LCD Video Wall DP

Indoor Super Narrow Display
3.5mm to 0.88mm

- Screen scale: 16:9
- Resolution: 1920*1080
- Contrast: 4000:1/1400:1
- Brightness: 500/700cd/ m²
- Response time: 8ms
- Visual angle.: horizontal / vertical: 178°
- Backlight: LED backlight
